Ivan Pashkulev

Senior DevOps Engineer at Strypes

Bansko, Blagoevgrad, Bulgaria

Summary

After being a Radio Producer in radio FM+ and BNR, also DJ and Ski Instructor for many seasons in Pamporovo and Bansko, in 2015 I entered the world of Software Development.

I graduated in Softuni where I studied Java and JavaScript Development. My programming language skills as of 2025 include:

- Clean Code (uncle Bob Martin)
- Java (Core Java, Java EE, Spring, Hibernate)
- JavaScript (Vanilla JS, TypeScript, NodeJS, ExpressJS, React, Angular, JQuery)
- Python (Flask, FastApi, Pydantic, SQL Alchemy)
- A little bit of .NET
- Scripting Languages (Bash / Powershell)
- HTML, CSS, SCSS

Regarding Database providers, I have experience with all the major relational databases:

- Oracle
- MS SQL Server
- Postgre SQL
- MySql
- SAP Hana

Regarding non relational databases, I have mostly used Mongo DB.

During my 3 years in Softuni I was exposed to intensive programming training. What I noticed is that after the initial frustration of having so much to learn, now I'm really quickly adopting new technologies!

In November 2018 I started my new career as an Intern at SAP. A year later I was promoted as a regular developer (skipping junior position) and I was really lucky to be part of a great team of young and motivated people.

In the summer of 2021 I received a job proposal that I could not resist and if by magic I switched my IT career path becoming a DevOps engineer at ICT Strypes. At the beginning I didn't have any DevOps knowledge so I went through another extensive training in Azure Cloud and Azure DevOps, Terraform, Linux OS, Bash and Powershell Scripting as well as many other technologies.

Now I can say that I really see the bigger picture in the IT industry - from first line of code, all the way to production deployments via CI/CD. And this is something that I was missing as a developer, especially when working for big projects in big companies where as devs we are usually focused on some tiny bits of the functionality and quite often we don't see how everything relates and connects with each other. But DevOps made the difference and Azure was my major playground between 2022 and 2024.

In 2024, ICT Strypes started to develop a CyberSecurity team offering Penetration Testing as a Service and I became one of the new team members. In December 2024 I obtained my first certificate (OSWA) issued by the founders of Kali Linux - Offensive Security.

In 2025 I'm more and more into AI, LLMs, MCP (Model Context Protocol) and all the hot stuff.

We are living in exciting times with so much opportunities!

The future looks bright and the best is yet to come:))

Experience

Strypes

Senior DevOps Engineer

July 2021 - Present (4 years 9 months)

Sofia, Sofia City, Bulgaria

Self Employed

DJ

July 2000 - Present (25 years 9 months)

Bulgaria

Mixing, scratching, battle DJing, you name it! I won a few DJ Championships here in Bulgaria including RedBull3Style and DMC. People recognize me as a true Party Rocker and also as one of the most technically skilled DJs. With my old-fashioned way of playing vinyl records and my super selection of funky, groovy beats, I'm always capturing people's hearts!

SAP

2 years 9 months

Developer

October 2019 - July 2021 (1 year 10 months)

Sofia

Full Stack Developer

Internship

November 2018 - October 2019 (1 year)

Sofia

Pamporovo Ski School, Inter Bansko and Ulen Ski School

Ski Instructor

December 2008 - April 2018 (9 years 5 months)

Pamporovo and Bansko, Bulgaria

I am a certified ISIA Ski Instructor which is a top level recognized worldwide. During my 7 seasons I made so many new friendships. I taught hundreds of people how to ski and enjoy the beauty of the snowy mountain. But most of all I contributed for a spectacular and unforgettable holiday to all these people. And of course I had lots of fun as well:))

Bulgarian National Radio

Radio Producer

July 2014 - October 2016 (2 years 4 months)

Sofia, Bulgaria

The Bulgarian National Radio is the "Mother" media in Bulgaria! Basically I was the fresh force with enough experience, knowledge and talent to produce contemporary sounding Radio Imaging when necessary:))

Radio FM+

Radio Producer

February 2005 - March 2013 (8 years 2 months)

Sofia, Bulgaria

Radio FM+ is the first private radio station in Bulgaria and luckily my first job. I had the chance to meet some of the best professionals in the industry by that

time and learn from their experience. We were literally setting the standards of how a contemporary radio should sound! During this period I gathered most of my experience in the Radio Production Business. Our Jingle Packages were nominated and awarded year after year at the media festival in Albena for best Radio Show, Best Social Campaign, Best Radio Imaging, etc.

Education

Software Unversity

Software Engineering, Java Web Development, JavaScript
Development · (2015 - 2018)
